PROFESSIONAL SUMMARY

Computer Science undergraduate and aspiring Data Analyst skilled in Python, SQL and Power BI, with strong ability in data cleaning, exploratory data analysis and predictive modeling. Experienced in turning raw business data into clear insights, dashboards and reports that support decision-making, having worked across datasets of 50,000+ records. Seeking an entry-level data analytics role to apply these skills in the industry.

SKILLS

Programming & Querying: Python (Pandas, NumPy, Matplotlib), SQL

Data Visualization & Apps: Power BI, MS Excel, Streamlit

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Insight Generation

Predictive Modeling: Scikit-Learn, XGBoost, Random Forest, K-Means, Classification, Model Evaluation

Databases & Tools: PostgreSQL, FastAPI, Docker, Git/GitHub, AWS (Cloud Fundamentals)

EDUCATION

Vellore Institute of Technology

Aug 2023 – May 2027

B.Tech in Computer Science and Engineering | Full-time

Coursework: Applied Mathematics, Database Systems, Data Structures & Algorithms, Machine Learning, Cloud Computing and Software Engineering.

EXPERIENCE

AI/ML Intern (MPOnline)

May 2026 – Jul 2026

Python | Scikit-Learn | FastAPI | Docker

- Analyzed and processed large-scale operational data across 50,000+ customer interaction records, applying feature extraction, automated data cleaning pipelines, and statistical modeling to drive system efficiency.
- Engineered machine learning algorithms, sentiment analysis models, and predictive workflows using Python and Scikit-Learn to automate unstructured text and image evaluation.
- Translated quantitative models into scalable FastAPI microservices containerized with Docker, establishing interactive API documentation and streamlining data flow across enterprise services.

Gen AI Powered Data Analytics Intern, Remote (Tata iQ – Forage)

Dec 2025

Python | EDA | GenAI | Business Intelligence

- Conducted exploratory data analysis using Generative AI tools and Python on a 500-customer credit dataset to unearth key delinquency risk and business trends.
- Formulated data-driven strategic insights across 4 deliverables, synthesizing quantitative findings into executive summaries and visual reporting for corporate decision-making.
- Leveraged automated data preprocessing, data cleansing procedures, and prompt engineering strategies to accelerate insight generation and business intelligence workflows.

PROJECTS

Customer Churn Analysis & Behavioral Segmentation

Jul 2026 – Aug 2026

Python, SQL, Power BI, K-Means, XGBoost

- Engineered churn features from customer data using Pandas and SQL, handling missing values, then segmented customers into 3 cohorts (At-Risk, Champions, Lost) with K-Means and RFM.
- Trained 2 models, XGBoost and Random Forest, to predict churn and identify the key risk drivers behind customer attrition.
- Designed an interactive Power BI dashboard tracking 3 areas: customer retention, cohort behavior and churn trends.

Employee Attrition & Salary Intelligence Platform

Sep 2026

Python, Pandas, Scikit-Learn, XGBoost, Streamlit

- Delivered end-to-end analysis in Python on 1,470 HR records, covering data cleaning, EDA, feature engineering and encoding of 32 features to uncover the factors driving attrition and salary variation.
- Trained, tuned and validated machine learning models to predict attrition risk (16% attrition rate) and estimate salaries, comparing candidates with cross-validation and metrics such as recall and RMSE.
- Developed an interactive Streamlit web app, in place of a static dashboard, to explore attrition trends (e.g., 30.5% attrition with overtime vs 10.4% without) and run live predictions.

Brain Tumor Detection | Lead Researcher

Oct 2024 – Dec 2024

Python, scikit-learn, NumPy

- Led a 3-person research team through data ingestion, modeling, and evaluation on 3,000+ medical records using Python and scikit-learn.
- Applied normalization and stratified splits with rigorous quality controls to the modeling pipeline, achieving 90%+ held-out classifier accuracy.

CERTIFICATIONS

- Google IT Support Professional Certificate — Google / Coursera, 2026
- Applied Machine Learning in Python — University of Michigan / Coursera, 2025
- Data Analytics Job Simulation — Tata / Forage, 2025
- AWS Certification — Intellipaat, 2025
